

Flowcode V9 - Aula Zero

Instrutor: Eng. Gabriel Rosa Paz (Equipe Microgenios)

Série Primeiros Passos com a Microgenios

Quais os objetivo deste projeto?

- Visão geral da área;
- Conhecimentos necessários;
- “Caminho das pedras” para estudo e capacitação;
- Tendências;
- Oportunidades.

Série Primeiros Passos com a Microgenios

Organizadores:

Série Primeiros Passos com a Microgenios

www.microgenios.com.br

- **Fundada em 2006 (Gabriel e Fernando fundadores);**
- **Atuação:**
 - **Capacitação de profissionais (treinamentos online e presenciais);**
 - **Fornecimento de ferramentas de desenvolvimento (hardware e software).**

Flowcode V9 - Aula Zero

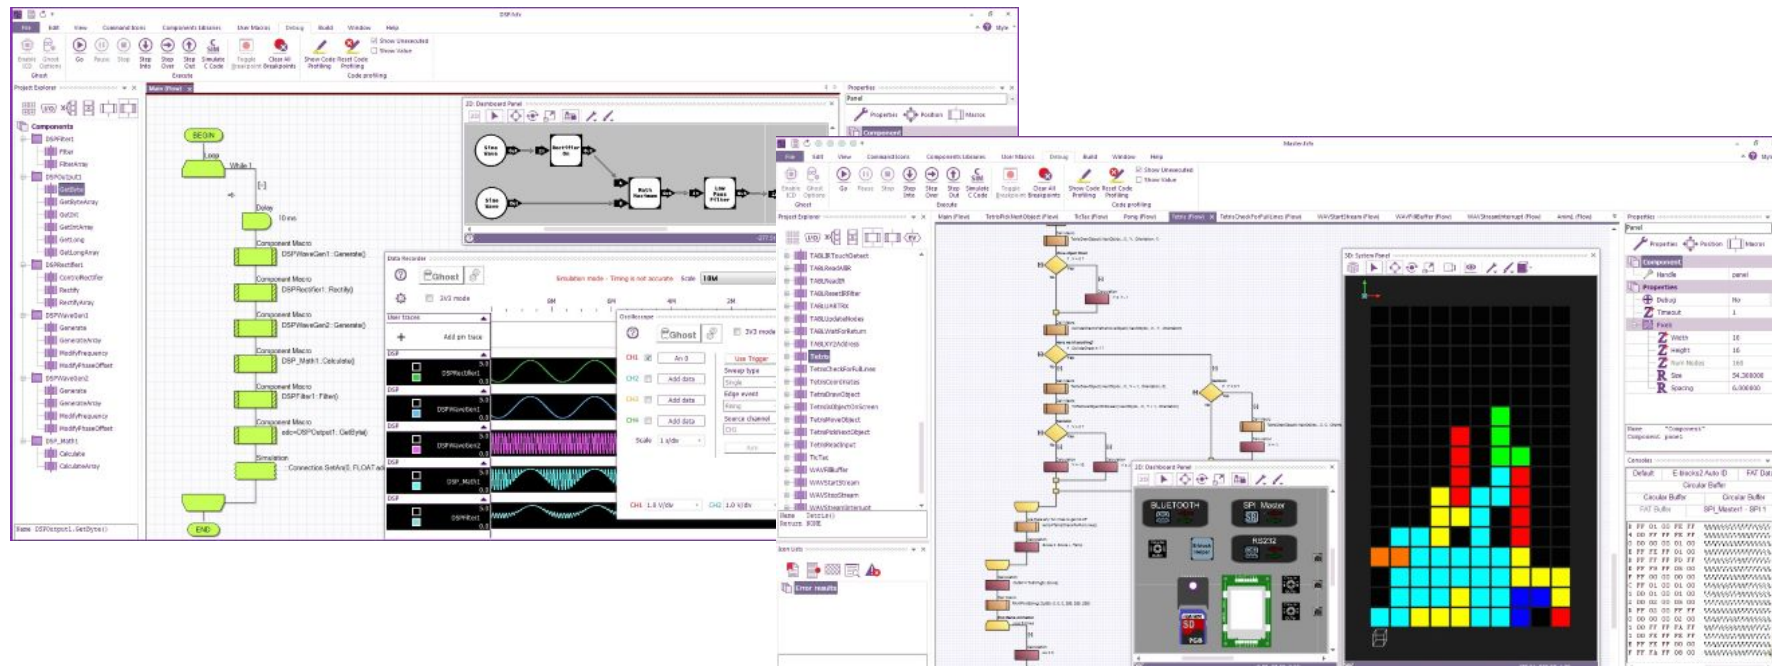

Assuntos que abordaremos nesta aula:

- **Download e instalação do Flowcode V9;**
- **Criação de conta no sistema da Matrix;**
- **Pacotes e versões disponíveis;**
- **Criação do primeiro projeto.**

O que é o Flowcode V9?

FLOWCODE

Electronic system design software

Download do software Flowcode V9:

Download Flowcode

FORMAT : Windows

SIZE : 240MB

VERSION : 9.0.0

RELEASE : December 2nd

DOWNLOAD

(32 and 64-bit version)

Versões e pacotes disponíveis:

The screenshot displays the 'User Type' and 'Chip Packs' sections of the Microgenios website. The 'User Type' section includes 'FREE' (selected), 'Hobbyist', and 'Professional' (£150.00). The 'Chip Packs' section lists various microcontroller packs: PIC8, PIC16, PIC32, AVR, Arduino, ARM, R-Pi, and ESP (FREE). The 'Feature Packs' section lists: Comms A, Comms B, Comms C, Basic IO, Displays, Mecha, DSP, Storage, Test, C-Sim, Sensors, and Models. The 'App Developer Addon' section includes 'App Dev'. A summary box on the right shows 'Price: £0.00' and an 'Add to Basket' button. A 'Free with Flowcode' section provides details about the trial and lists supported components.

User Type

- FREE
- Hobbyist
- Professional £150.00

Chip Packs

- PIC8 £50.00
- PIC16 £50.00
- PIC32 £50.00
- AVR £50.00
- Arduino £50.00
- ARM £50.00
- R-Pi £50.00
- ESP FREE

Feature Packs

- Comms A £25.00
- Comms B £25.00
- Comms C £25.00
- Basic IO £25.00
- Displays £25.00
- Mecha £25.00
- DSP £25.00
- Storage £25.00
- Test £25.00
- C-Sim £25.00
- Sensors £25.00
- Models £25.00

App Developer Addon

- App Dev £50.00

Price: £0.00

Add to Basket

Free with Flowcode

Click [here](#) for component details.

After your 30Day Trial your Flowcode will revert to a FREE mode, this contains some free components (click the link above to view the free components) and some free chips listed below. Free version also has an icon limit of 50 per macro and a maximum of 8 supported macros.

- ATMEGA328P
- Arduino Uno PDIP
- Arduino Uno R3 PDIP
- Arduino Uno R3 SMD
- Arduino Uno SMD
- Arduino LilyPad 328

Criação do primeiro projeto

Obrigado e até a próxima aula.

Bons estudos e projetos a todos!
